OUR OFFICE AND STORAGE FACILITIES LOCATED 1 MILE SOUTH OF ROGERS ON HIGHWAYS 71 AND 62

Where We Are . . .

We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort

Smith, Arkansas, and eighty-three miles almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Ark.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is

almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

ORNAMENTAL SHRUBS ★ FLOWERING SHRUBS

These shrubs are well rooted and will grow into an extra fine plant in one year. They are first class in every respect and you are sure to be well pleased with them. This lot will range in height from 10 to 24 inches and extra good plants; ALTHEA (Rose of Sharon), double white, red or pink; DEUTZIA, Pride of Rochester; FORSYTHIA, Intermedia; HONEYSUCKLE, white or pink; MOCK ORANGE, white; PRIVET (hedge plants), California, Amoor River, and Ibolium; SPIREA, Van Houttei; SNOWBERRY, red; WEIGELIA, pink; HYPERIUM (gold flower), yellow.

Thirteen Reasons Why You Should Buy From Us:

- 1 Because we sell you the best trees, plants and vines that can be produced at prices far below what others will ask you for the cheap, worthless kind. Our nursery stock is grown by the best methods known to nurseries and no better can be produced regardless of prices. We offer \$100.00 reward for improved method on how to grow better nursery stock.
- 2 Because we prepay the postage or express charges on all orders amounting to \$10.00 or more, except Balled or Burlapped Evergreens.
- 3 Because we sell direct to the fruit growers saving you the agent's or middleman's commission.
- 4 Because we guarantee satisfaction or your money refunded, and we pay postage or express both ways.
- 5 Because we do not belong to any trust or combine, and are free to make our prices just as low as we believe we can afford.
- 6 Because all our trees and plants are guaranteed to be free from disease and insects, and have all been inspected by our State Inspector and each shipment bears a certificate of inspection.
- 7 Because we use every caution to keep all our varieties true to name and should a mistake occur and any variety prove untrue to name we will replace it free of charge or refund the price paid for it.
- 8 Because we grow and offer for sale only varieties that are known to be good fruits and money makers.
- 9 Because Benton County, Arkansas, has many, many acres of varieties of fruits and we have under our close observation a greater variety of fruits and berries than our competitors.
- 10 Because Ozark Mountains, Arkansas, Grown Nursery stock is now considered by Horticulturists to be the best that can be produced.
- 11 Because trees and plants must be well rooted if success is to be made with them. Ours are the best to be had.
- 12 Because our old customers send us repeated orders and their neighbors send us their orders; a proof that they are well pleased.
- 13 Because we use extreme economy in both growing and selling our nursery stock, thereby saving money for you.

BEAUTIFUL COLLECTION

Large, Bushy, 4-5 ft. Plants
1 each:

DEUTZIA, Pride of Rochester
HONEYSUCKLE, Tartarian.
SPIREA, Billardi
WEIGELIA, Rosea
FORSYTHIA, Intermedia
SYRINGA, Mock Orange

ALL FOR \$1.00 Express Collect

**WE CANNOT ACCEPT
ORDERS FOR LESS
THAN \$1.00**

Because of the heavy expense of packing and high rates on first pound by parcel post and express we cannot fill orders for less than \$1.00, without loss to us, and will ask you to make your orders amount to \$1.00 and up.

Benton County Nursery's TREES, SHRUBS and PLANTS are GUARANTEED TO LIVE. All You Have To Do is Follow the Simple Requirements Below.

We want you to be pleased with your orders you receive from us, we know that is the only way we can expect you to be a satisfied customer. Every plant that you order from this circular is **guaranteed to live**. We will replace free of charge any or all plants you buy that fail to live. We are not asking you to take any risk whatsoever, just give us your order and let us prove to you that we

mean what we say. **All you have to do** is be sure that your order is received on or before **May 15, 1944**, and that you notify us of any plants that fail to live on or before June 1, 1944. All we want is an opportunity to show you that we are proud to have you as a customer and leave the rest to us. We guarantee you will be a satisfied patron.

BENTON COUNTY NURSERY CO.

ROGERS, ARKANSAS

VEGETABLES VITAMINS VICTORY

GREEN POD BUSH BEANS

1,200 to One Beans—A Gigantic Wonder. Over 200 pods have been grown on a single plant—all well filled, producing over 1,200 beans from one bean. Strong, erect plants, bearing pods well up from the ground. Order now as supply is limited.

Pkt. 10c; 7 oz. 35c; 2 1/2 lbs. \$1.30

TENDERGREEN—STRINGLESS

53 days. Plants make a strong, vigorous growth; are well branched and bear a great quantity of beautiful dark green, round, extremely meaty, tender pods, 6 to 7 in. long. Absolutely stringless at all stages of growth; always free from fiber, and of the most delicious flavor. Pods mature early and are borne profusely for a long time. The attractive appearance of the high quality pods makes them ideal for market or canning.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

FULL MEASURE—STRINGLESS

54 days. Medium-early, well-branched round plants bearing a large crop of perfectly stringless, very fleshy, deep green round pods measuring 5 in. in length. Quality is superb and the flavor rich and satisfying. Popular on account of its high yields and long picking season.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

GIANT STRINGLESS GREEN-POD

51 days. The straight, rather slender pods grow 6 in. long; meaty, round, brittle, and absolutely stringless. Somewhat similar to Burpee's Stringless Green-Pod. Seeds are a light brown color. The plants are of strong growth, compact, and bear a heavy crop of pods for a long time.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

BOUNTIFUL, STRINGLESS GREEN-POD

48 days. Attractive green pods of the choicest quality; 6 in. long, flat, tender, strictly stringless, and of rich flavor. Matures early. Has proved to be unexcelled on heavy as well as light soils; reliable everywhere. Plants are vigorous, hardy and very prolific, bearing over a long season. Bountiful is the best of the flat green-pod Bush Beans.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

Improved Golden Wax Beans

Undoubtedly one of the best wax beans for the home garden. Rust-proof, an improvement of the old style Golden Wax. Pod is semi-round, yellow, of good quality, and it has no strings. Ready for picking 47 days from planting.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

POLE BEANS

KENTUCKY WONDER OR OLD HOMESTEAD

65 days. We prefer this to all other green-podded pole beans. It is early, climbs well, and bears a heavy crop of large, green, curved pods, 7 to 9 in. long. They are thick and meaty, tender, brittle, and of good quality, showing slight stringing as the pods reach full size. Though thick, they appear slender on account of their great length.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

MISSOURI WONDER

65 days. Round, medium green pods, 6-in. long. Extremely early. Excellent corn hill beans for snaps.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. 90c

WHITE CREASEBACK

68 days. The green pods are 6 in. long, round, deeply creased or saddle-backed, entirely stringless and brittle. The white seeds are fine for baking.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. 90c

Be Sure to Order Your Seeds Early as there is a big shortage of most varieties this year.

BEETS

CROSBY'S EGYPTIAN

48 days. An extra-early variety for home and market garden use. Unexcelled for bunching. Roots are smooth, round, with slightly flattened tops; small tap-root. The flesh is very dark blood-red. Tops are medium and the roots deep purplish red. Crisp and tender.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 70c

DETROIT DARK RED

59 days. An early maturing beet of remarkable uniformity. Splendid for the home garden, market, shipping and canning. Perfectly round and of a deep red color. They reach 2 1/2 to 3 in. in size and have a small collar and a thin tap-root. The flesh is very blood-red, showing hardly any zones. It is tender, fine-grained, exceptionally sweet. Medium size foliage.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. \$1.00

CARROTS

CHANTENAY—LONG TYPE

70 days. A new strain of Chantenay bred to meet the recent popular market demand for longer Carrots. Roots deep orange, smooth, tapered, stump-rooted. The strong, medium tops make it an ideal variety.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

DANVERS HALF LONG

75 days. A prime favorite because of its brilliant market appearance. The smooth, handsome roots are 6 1/2 to 7 1/2 inches long, tapering to a blunt point. Flesh is a deep, bright rich orange color, tender, sweet, and crisp. When bunched it makes the most attractive Carrot on the market, sells always at top market prices. Our strain is outstanding.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

NEW CORELESS CARROT

A new rapid growing variety of superior flavor; tender and without any woody heart or core. Roots are half-long, blunt-pointed and grow to a medium size; are very smooth, and of a deep orange-red color. Highly recommended for market or home use when either young or full grown.

Pkt. 15c; 2 pkts. 25c; 1 oz. 50c

SOUP BEANS

The Old Standby for Winter Use GREAT NORTHERN

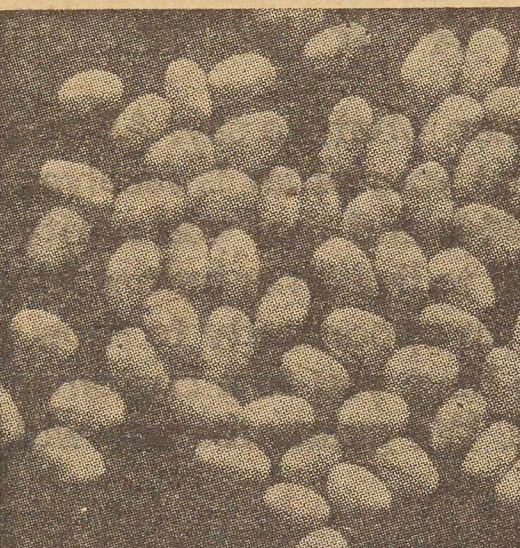

90 days. (Montana White.) A little larger than the Navy Bean but eats every bit as well and is lots easier to pick over. A good yielder and early.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c
2 1/2 lbs. 80c

RED KIDNEY

70 days. As easy to grow as the others. Good yielder of large, dark red, dry beans. Just the thing for baking or for soup.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. 90c

Burpee's Improved Bush — The largest of all Bush Lima, bearing pods almost equal in size to those of the large Pole Limas. Pods 3 to 6 inches long by 1 1/4 inches wide and the full size beans are of luscious flavor.

Pkt. 15c; 7 oz. 35c; 14 oz. 45c
2 1/2 lbs. \$1.00

CABBAGE

LIGHTNING EXPRESS

The Earliest Cabbage in Cultivation Our Lightning Express is ready for use in 65 to 70 days from sowing—ten days earlier than Jersey Wakefield. Good fair trials of varieties offered by other such houses as "the earliest grown" have proved that they are from four to ten days later than our Lightning Express.

LIGHTNING EXPRESS is positively the earliest cabbage in cultivation. The heads are pointed, of good size, a little smaller than Jersey Wakefield, always sure to head, solid and firm, and always in demand on the market, bringing high prices on account of their extreme earliness. Very hardy, permitting earliest planting. There are but few outer leaves, and plants may therefore be set closely together. As many as 14,000 heads can be grown on one acre of ground, and will bring a larger profit per acre than later and heavier varieties.

Pkt. 15c; 2 pkts. 25c

CHARLESTON WAKEFIELD

71 days. About a week later than Early Jersey Wakefield, but the conical heads are fully one-half larger, less pointed, and usually weigh 4 to 5 pounds. The heads are broad, heart-shaped, 8 inches long, 7 inches broad at base, firm, very solid, and a heavy yielder. Largely used in the South for spring shipping to northern markets and also excellent for the home garden and truckers.

Pkt. 10c; 3 pkts. 25c; 1 oz. 30c

EARLY JERSEY WAKEFIELD

62 days. Our stock is characterized by its distinctive, smooth, blue-green leaves. It has all the elements that count for cold-resistance and unusually early maturity. The small, compact, hard, conical heads are 7 inches long, 5 inches wide at the base, and weigh 2 pounds. Plants small, with short stems, permitting close setting in the row. Valuable for the home and market-garden.

Pkt. 10c; 3 pkts. 25c; 1 oz. 30c

MAMMOTH RED ROCK

By far the best, largest and hardest heading red cabbage in cultivation; very uniform in size, weight, solidity and deep red color. The heads grow to weigh ten or twelve pounds.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

See Our Low Prices on Hardy, Frost-Proof Cabbage Plants, Page 10

Chinese Celery Cabbage

CHINESE CELERY CABBAGE

A most delicious vegetable which combines the rich celery flavor with that of the cabbage. Can be cooked or eaten like celery. Makes a good salad as the finest head lettuce. The mid-ribs can be cooked like asparagus, and for cold slaw, no cabbage compares with it. One of the most delicious vegetables yet introduced, and bound to become one of the most popular.

Pkt. 10c; 3 pkts. 25c

GIRASOL—The Lazy Man's Spud

Choice Seed Tubers: 6 for 40c; 12 for 70c; 25 for \$1.25; 50 for \$2.25; 100 for \$4.00 postpaid

If someone were to discover a plant "Sport" or if some plant breeder could cross sunflowers or corn with potatoes to get a plant, the tops of which would make silage and, at the same time, produce valuable tubers that would outyield potatoes two or three to one, under similar soil and moisture conditions, we would have the result as a wonderful discovery. Girasol will do all this and more than enough to cover cost of seed and rental and cultivation expenses. Adding grain to balance the ration would of course help. Every farm should have from one-fourth to one acre of Girasol because the name under which it sometimes passes is the same as another vegetable entirely different which is confusing. The scientific name is Helianthus Tuberosus; it is related to both artichokes and sunflowers; it is a native of America, not Jerusalem or elsewhere. Girasol tuber will outyield potatoes two or three to one under similar conditions. Yields of 10 to 20 tons per acre are common. Girasol tops are about a third or a half the diameter of sunflower stalks, but usually two or three feet taller and yield 10 to 22 tons silage per acre. Girasol is not injured by freezing. The whole or a part of the crop of tubers may be harvested in the fall or the spring following. Girasol is propagated by tubers only, not from roots and joints like quack grass and thistles so it cannot become a serious pest if followed with pasture, hay meadow or good cultivated crops.

WONDERFUL HOG FOOD All stock and poultry like Girasol tubers, but perhaps the most profitable use would be as hog feed, the hogs doing their own harvesting with no expense. Trials along this line have yielded 744 pounds pork gain per acre; this might be considered NET PROFIT. The silage crop would be more than enough to cover cost of seed and rental and cultivation expenses. Adding grain to balance the ration would of course help. Every farm should have from one-fourth to one acre of Girasol because the name under which it sometimes passes is the same as another vegetable entirely different which is confusing. The scientific name is Helianthus Tuberosus; it is related to both artichokes and sunflowers; it is a native of America, not Jerusalem or elsewhere. Girasol tuber will outyield potatoes two or three to one under similar conditions. Yields of 10 to 20 tons per acre are common. Girasol tops are about a third or a half the diameter of sunflower stalks, but usually two or three feet taller and yield 10 to 22 tons silage per acre. Girasol is not injured by freezing. The whole or a part of the crop of tubers may be harvested in the fall or the spring following. Girasol is propagated by tubers only, not from roots and joints like quack grass and thistles so it cannot become a serious pest if followed with pasture, hay meadow or good cultivated crops.

Hopi Indian Bean

This Bean has been grown by the Hopi Indians of Northern Arizona from prehistoric times under strictly dry farm conditions and crude farm practices. In trying these out, we find them to be a very fine eating bean. A small crop grown in 1933 and the growers claim that they produced more heavily than any bean we have. They are semi-vining, long rooted, drought-resistant beans, and should be placed in rows 30 to 40 inches apart. They require the full Summer season and should be harvested before frost. They have the true large lima flavor and the Indians claim they are strongly anti-acid, in this being very much different from the usual Navy and Pinto beans and can be eaten with benefit by people who cannot digest most beans. The great productivity of this bean under general climate conditions should make it very popular with gardeners and we suggest that you try out a supply this year.

Pkt. 10c; 7 oz. 35c; 2 1/2 lbs. \$1.20

EDIBLE SOYBEANS

For Vitamins

Rivals Meat — Not Rationed

Bansei—90 Days. An early edible type adapted for production of ripe beans in regions of short seasons but suitable for green shelling. Very productive, not as susceptible to shattering. Pods yellow with black tinged. Plant erect and medium height. Seed medium sized and yellow.

Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. 90c

LARGE WHITE POLE LIMA

88 Days. Also known as "King of the Garden." Pods are 6 inches long, broad, flat, and contain 4 or 5 large greenish white Beans of superior quality. Productive over a long season.

Pkt. 15c; 7 oz. 35c; 14 oz. 45c
2 1/2 lbs. \$1.00

The "Frost-Proof" Bean

You Can Plant It Early with the Radishes 75 days. ENGLISH BROAD BEAN. Sometimes called the "frostproof bean." Different and unusual. Plant with your early garden at the same time you plant radishes and onions. Very hardy. Its growing habit between a bush and vine. Shell beans are large and have a distinctive flavor.

Pkt. 15c; 7 oz. 35c; 2 1/2 lbs. \$1.20

Fresh Vegetables FROM YOUR OWN GARDEN Are More Delicious

★ CUCUMBERS ★

BOSTON PICKLING—(60 days) An early pickling or slicing variety. Fruits weigh about 1 1/2 lbs., 6 in. long and 2 1/2 in. in diameter.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

STAYGREEN — (60 days.) Our strain is the improved long type and is one of the most productive and popular cucumbers in use today. For years it has been a leading shipper and is commonly used in the home and market gardens.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

IMPROVED LONG GREEN—(70 days) One of the best for all purposes—fruits long and slender, seed cavity small. Fruits weigh 2 1/2 lbs., are 12 to 15 in. long and 2 1/4 in. in diameter.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 95c

WEST INDIA GHERKINS

(60 days.) A little oval shaped prickly pickle which is said to have come from the West Indies. Very prolific bearer, a stronger grower than most cucumbers, grows anywhere and is practically bug and disease proof. Price:

Pkt. 10c; 3 Pkts. 25c

★ LETTUCE ★

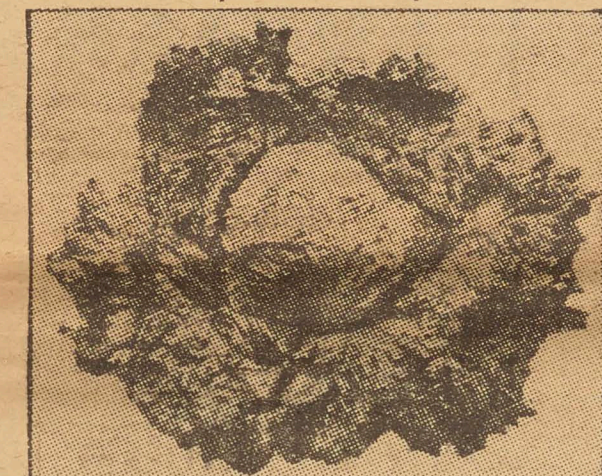

Loose Leaved Varieties

BLACK SEEDED SIMPSON—A favorite among the loose leaved kinds, very crisp and tender.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

EARLY CURLED SIMPSON—The best of early varieties of the loose leaved kinds; leaves light green, crisp, and fine flavor.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

HEAD LETTUCE

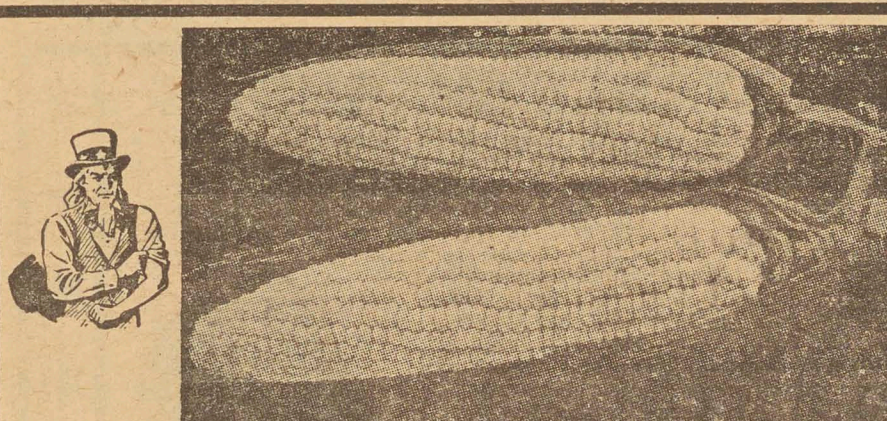

NEW YORK No. 12 (Or Los Angeles Market)—An improved type, early and sure heading. Is of fine appearance, excellent quality and has a large percentage of perfect heads.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 85c

BIG BOSTON—A variety highly recommended for home gardeners. Sure header medium size, outer leaves attractive green color tinged with brown. Heads are a crisp, fine buttery flavor. Be sure to plant this variety in your home garden.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

KEEP THE FOOD PRODUCTION LINE GOING!

SWEET CORN

GOLDEN BANTAM — (83 days) This golden colored corn is the leading variety for early home garden planting; ears, though small, are numerous and of finest quality, very sweet and tender. Plants 4 1/2 to 5 ft. tall, ears 6 to 7 in. long, 8 rows.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c
2 1/2 lbs. 85c

STOWELLS EVERGREEN—(105 days) Best for late corn. Kernels white, plants 7 to 7 1/2 ft. tall, ears 8 in. long, 14 to 20 rows.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c
2 1/2 lbs. 85c

HYBRID SWEET CORN — Golden Cross Bantam

85 days. Bred for wilt-resistance, high yield and superlative quality, and the result of crossing Purdue 39 and Purdue 51. Grows 7 to 8 ft. high. Usually two ears, 7 1/2 to 8 in. long, each with 10 to 14 rows of light golden kernels, are produced to a stalk.

Pkt. 15c; 7 oz. 35c; 14 oz. 60c; 2 1/2 lbs. \$1.30

GROW MORE FOR YOUR HOME AND COUNTRY

★ Egg Plant ★

BLACK BEAUTY — (83 days) An early variety, large, oval-shaped and the deep purple kind that tastes surprisingly like oysters when fried. This variety is a great producer, 50 to 60 lbs. having been grown from one plant.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 60c

FREE!

With each order for seed amounting to \$3.00 or more, we will include FREE a big package of our Famous Flower Garden Mixture. Contains over eighty different varieties.

KILOGEN....Kills many of the insects that ruin house and garden plants. Also kills ants on lawns and flower beds. 2 1/2 oz. bottle—makes 250 times its volume. Postpaid.....

50c

Remember, Orders for Seed are Postpaid

Grow YOUR OWN DILL

70 days. Annual. The young stems are nice for flavoring soups and sauces and are used extensively in a minced state with lettuce. The dry or green branches and seeds are much prized for flavoring dill pickles.

Pkt. 10c; 3 Pkts. 25c

★ onions ★

EBENEZER The Extra Early, Long Keeping, Mild Onion

One of the mildest flavored onions grown. The flesh is white, firm and of a very delicate flavor. The onions are quite similar to Yellow Globe Danvers in shape but much larger in size, yellow skinned and have very small tops and mature early. Many people who know this onion will have no other kind for their own table. In the localities where it has been grown, the onions of this variety command much higher prices than other kinds. Those who want a nice mild onion, either for large onions or bottom sets, would do well to try the Ebenezer. Sets are grown the same as large onions, except that the seed is sown thickly—one pound of seed to each 100 feet of drill. These sets, if planted early in the spring, will produce ripe onions in July, at which time they will bring a high price. Sets of this variety rarely produce seed stalks as other kinds do. The Ebenezer is such a good keeper that even those ripening in July will keep sound and hard through the fall and all winter. Don't fail to plant some Ebenezer onion seed this season, saving some for large onions and some for sets.

Pkt. 15c; 2 Pkts. 25c

(110 days.) White Sweet Spanish

Large, mild and sweet. Pure white. A much better keeper than the Bermudas.

Pkt. 15c; 2 Pkts. 25c, Postpaid

For Onion Plants See Page 10

★ Okra ★

WHITE VELVET

Strong, tall-growing, 3 1/2 to 4 feet in height. The pods are about 6 to 7 inches long, white, slender, fleshy, and very tender. Early maturing and extensively grown for home use and local markets.

Pkt. 15c; 3 Pkts. 25c; 1/4 lb. 50c

DWARF LONG GREEN POD

Early and very prolific. Grows 2 1/2 to 3 ft. tall; pods dark green, fleshy and tender; become 7 to 8 inches long and 1 1/4 inches in diameter; tapered near tip.

Pkt. 15c; 3 Pkts. 25c; 1/4 lb. 50c

★ Mustard ★

SOUTHERN CURLED—Leaves large light green finely curled, and have a mild agreeable flavor. It also makes a fine greens for poultry.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 45c

★★ Peas ★★

AMERICAN WONDER THE DROUGHT RESISTER

(60 days.) Always comes into bearing ahead of the other wrinkled ones. Very dwarf, medium size pods of good quality, unusually productive.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c; 2 1/2 lbs. 85c

ALASKA

or Earliest of All

60 days. Standard, popular, extra-early smooth-seeded pea for market and eating. Vines 2 1/2 ft. tall; light green. Well-filled, medium-sized pods completely packed with small round green peas, which mature practically all at one time. The pods are plump and round, light green, blunt. The mainstay of the grower who wants a variety that can be cropped in one picking.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c; 2 1/2 lbs. 85c

THOMAS LAXTON

(57 days.) This has no superior as an early Pea of medium height. The vines are strong, with large dark green foliage, and grow 2 1/2 to 3 feet tall. They bear a surprising number of dark green pods, blunt-ended, and 4 to 4 1/2 inches long. These are well filled with large, tender Peas which retain their pleasing flavor and sweetness until they begin to harden. Unsurpassed for the home-garden and shipping.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. 95c

LITTLE MARVEL Tender, Heavy Yield

"FOOD WILL WIN THE WAR and WRITE THE PEACE"

MUSKMELON

HALE'S BEST Most Popular Market Sort

(80 days.) Medium size, very early sort, slightly oblong, but well netted and very attractive. Thick flesh, deep orange color, extensively planted in the commercial muskmelon growing districts.

HEARTS OF GOLD The Sweet Table Melon

(95 days.) The name about described it. Medium size, round, well netted, sweet and tender.

Tip Top

96 days. (Salmon Flesh.) A large size, main-crop melon, varying in shape from round to slightly oblong. The pale green skin is distinctly ribbed and lightly netted. Flesh is a beautiful deep salmon, sweet, spicy, and full of rich aroma. Popular with home gardeners and, in some sections, a leader with market growers.

Honey Dew

110 days. (Green Flesh.) The well-known green-fleshed melon for warm climates; will not do well in the north or east. Smooth, ivory colored skin; rich, emerald-green very sweet flesh.

Honey or Sugar Rock

(85 days.) An early variety increasing in popularity among market gardeners and shippers. Fruits—5-6-in. in diameter, round to slightly flattened, coarsely netted, rind strong, deep salmon color.

All varieties, pkt. 10c — 3 pkts. 25c
1/4 lb. 85c

WATERMELONS

Stone Mountain

88 days. Also known as Dixie Belle. A popular round watermelon with grayish green smooth skin and beautiful deep crimson flesh without any white in the heart or stringiness. The average melon weighs about 45 lbs. each. It has a thin rind and is fine for home use and local markets where a nearly round melon is desired.

Winter Watermelon

A home-grown melon for your Thanksgiving dinner. It is not a citron or a freak, but a very prolific, long-keeping true watermelon. Flesh red, extremely firm, very brittle and deliciously sweet. Fruits taken from the field before killing frosts and stored in a cool place will keep long into the late fall and early winter and retain their delicious sweetness and flavor.

Tom Watson

(95 days.) A very large melon weighing 35 to 40 pounds. An excellent shipper. Skin is light green, with darker green veins. The flesh is deliciously sweet and juicy.

Kleckley's Sweet or Monte Cristo

One of the earliest, best and sweetest-flavored melons in cultivation. On account of its thin rind, it will not stand shipment to distant markets, but it is the best that can be grown for the home and nearby markets. The skin is dark green. It is of symmetrical oblong shape, well rounded on both ends. The flesh is scarlet, firm, solid, and of delightful flavor.

All above varieties.....Pkt. 10c
3 pkts. 25c — 1/4 lb. 75c

POPCORN

AFRICAN GIANT POPCORN

Special Bred Disease-Free Seed Pop Corn

Extra large, smooth grains. Some of them as large as one inch in diameter after popping. Pops with a loud bang. The minute it starts to pop, it sounds like a battle. Rich, cream-colored grains. Tender and delicious.

Big 7-oz. Package for 30c

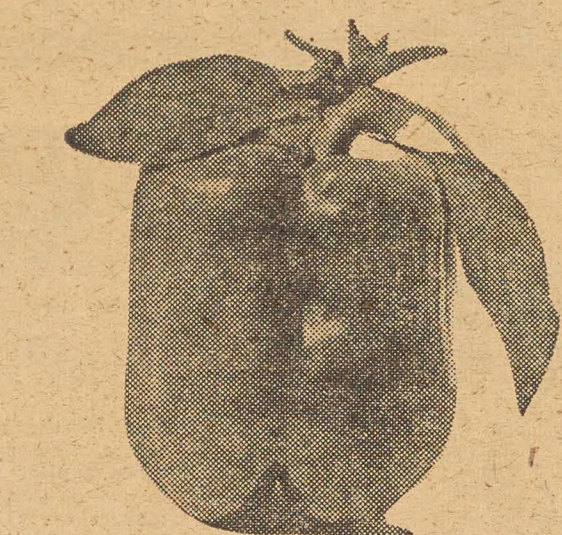

Enough to raise all the seed you need for next year.

American Hullless

Kernels translucent waxy white; large and snow white when popped.

Pkt. 10c; 7 oz. 25c

Page Four

PEPPERS

California Wonder

(122 days) The best large fruited pepper, very smooth, color deep. Meat thick, tender, and of finest flavor. It is fast replacing other varieties. Peppers are about 5 inches in length and 4 in width, being blocky in shape. Rich and glossy green.

Pkt. 10c; 3 pkts. 25c; 1 oz. 60c

Cayenne

(120 days) A very strong variety; fruit is long (about 5 in.) and slender, bright red when ripe.

Pkt. 10c; 3 pkts. 25c; 1 oz. 45c

Perfection Pimento

(125 days) The best of the medium sized smooth sweet peppers, largely used by canners, and excellent for stuffing. Peppers smooth, heart shaped, about 3 in. long.

Pkt. 10c; 3 pkts. 25c; 1 oz. 45c

VINE PEACH

Ripe fruit in 80 days after seed is planted. This wonderful Vegetable Peach is the most beautiful of all vegetables. They resemble oranges in color, shape and size, and grow on vines like melons. They present a beautiful and tempting appearance when canned and make delicious preserves and pickles; fine for pies. There is nothing like them. Extremely early; of the easiest culture, and very prolific.

Pkt. 10c; 3 Pkts. 25c

Mammoth Prize WATERMELON

Mammoth Prize is a large Watermelon. Many grown from 100 to 150 pounds. On one vine, 5 melons were growing that weighed 152, 151, 149 1/2, 148 1/2, and 147 lbs., the five weighing a total of 743 lbs. The seed we offer is extra select, and should produce fine, sweet, juicy melons of excellent quality and enormous size.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. \$1.00

PUMPKIN

Jumbo Pumpkin

Often weighs 100 to 300 lbs. Always a prize winner at exhibitions. A good pie-pumpkin, splendid keeper and valuable for feeding purposes.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 75c

Sweet Potato Pumpkin

Tennessee Sweet Potato is an excellent sort which, when cooked, resembles a sweet potato in flavor, but is of more delicious taste. It is pear-shaped and slightly ribbed. The color is creamy white, sometimes striped with green.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 65c

You Can and Must Do Your Share in Furnishing Food for a World Engaged in War!

GROW PLENTY of ... EARLY RADISHES

Scarlet Turnip White-Tipped

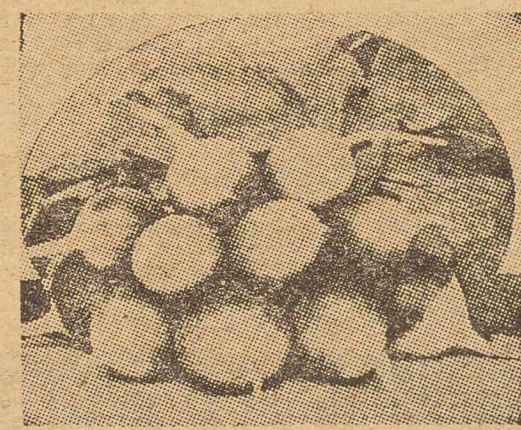

25 days. This Radish is a table delicacy, crisp, tender and sweet. A very deep scarlet with a distinct snow-white tip covering about one-third of the lower part. Medium in size, nearly round, with tap-root. We offer a high-class, refined strain.

White Icicle

27 days. Clear white roots which grow to a length of 6 inches, slender and tapering at the tip, brittle as ice and of mild, inviting flavor. A fine variety for both market and home gardeners who want an early, long white Radish.

All Varieties

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

Grimson Giant

28 days. If you desire a Radish of more than two bites, you will find this to your liking. The crimson roots are large, globular, 1 to 1 1/2 inches in diameter. Flesh is white, crisp, and of special quality. It grows quickly and remains tender and of fine flavor to the last. Valuable for home-garden use. The white flesh holds its firmness well. The tops are medium small.

SPINACH

BLOOMSDALE SAVOY—Extra dark green strain. A new, beautiful, better and darker strain. Its glossy green color gives the plants a fresh appearance for a longer time and it is quite early. The leaves are large, fleshy and deeply crumpled. The plants are of upright growth.

Pkt. 10c; 1 oz. 25c; 1/4 lb. 75c

SQUASH

Early Prolific Straightneck

New high yielding summer squash. Plants strictly bush and compact. Quality unsurpassed.

Table Queen

(80 days.) Sometimes called Acorn because of its shape. One of the most deliciously flavored squashes. If you like squash pie, use this variety. Just the right size to cut in half to serve two. About 6 inches long, shell is thin, hard, dark green. Flesh yellow and very tender.

Giant Summer Crookneck

58 days. Larger than the above, the golden yellow fruits growing 12 to 14 in. long and 3 1/2 to 4 in. across. Valuable for home or market.

Delicious

110 days. Has become known for its supreme quality. Produces medium sized, top-shaped, dark green fruits with light green markings. Individual fruits will weigh from 5 to 10 lbs. each. The dry flesh is bright orange, thick, fine grained, and of outstanding flavor. A splendid winter keeper.

All Varieties, pkt. 10c

3 Pkts. 25c; 1/4 lb. 75c

TRANSPLANTONE

The vitamin-Hormone stimulant. One ounce makes 1,000 gallons solution. Most effective form of Vitamin B-1. Use on all kinds of flowering plants, shrubs, seedlings, trees and vegetable plants when planting.

1/2 oz. 25c; 3 oz. \$1.00, Postpaid

VEGETABLE SPAGHETTI

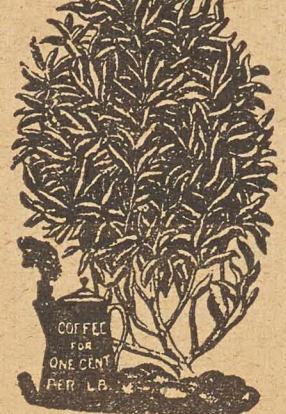

This delicious new vegetable from Persia thrives in all climates and in any ordinary garden soil. Each plant produces from six to ten beautiful bright yellow, oblong fruits about 8 to 10 inches long. Each fruit is filled with a delicious spaghetti-like pulp. When fully ripe, the whole fruit (without cutting or peeling) should be cooked 20 minutes in boiling water; then cut in half. A dishful of this delicious vegetable spaghetti comes out of each fruit. Season with salt, pepper and butter and serve hot. This remarkable vegetable is one of the most valuable and useful of recent introductions, and should be grown in every garden.

Pkt. 10c; 3 pkts. 25c

GROW YOUR OWN COFFEE

COFFEE—One Cent per Pound

Grow your own coffee at an expense of less than one cent per pound. The Domestic Coffee Berry makes a delicious, nourishing drink, to take the place of injurious coffee. It is a pure food drink that gives health and strength to young and old. The best coffee substitute ever discovered, and thousands pronounce it as good or better than the best coffee. It has the rich, deep brown color of old Java. One of the easiest grown and most productive of all plants. It is an early variety of soy beans; can be successfully grown in any climate, and is sure to ripen even in the extreme North. As easily grown as corn or beans, and does well on all soils. Thousands suffer untold injury from store coffee. Better grow some of the domestic Coffee Berry this year and save your health and money. Prepared like any other Coffee. Full directions with every packet.

BUY WITH CONFIDENCE Benton County Nursery's Seeds Are ALWAYS TOP QUALITY!

TOMATOES

EARLIANA

(94 days) Hardy and productive, coming into fruit in the shortest time and rapidly maturing the entire crop of fine fruit. Fruits are globe shaped, somewhat flattened, deep scarlet and smooth.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 45c

Rutgers—The Ideal Tomato

A commercial variety of great importance in most of the Eastern and Southern states. It is suitable for canning, juicing, and for long distance shipping. Large fruit size, 6 1/2 to 7 1/2 ozs., makes it favored over many other popular tomatoes. Globular in shape, slightly flattened, smooth, bright red, and with heavy walls and small cells. Vine is vigorous, heavy, and wilt-resistant to a high degree. It is particularly adapted to light soils and is grown on a large scale in New Jersey and Texas.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 45c

Break O'Day

63 days. Outstanding for its maturity, smooth, uniform, globe-shaped fruits, and resistance to wilt. Plants are large, producing an abundance of medium sized, bright red fruit with thick walls, small seed cavities, and splendid flavor. Best adapted to rich, heavy soils. For home and market.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 45c

Oxheart

86 days. One of the largest tomatoes ever produced, some fruits weighing 2 lbs. each. The skin is purplish scarlet, smooth, and evenly colored. The oxheart shape of the fruits is most distinct, and they are extremely solid, having few seed cells, which accounts for their enormous weight. It is primarily a home garden variety, but readily salable on local markets and roadside stands. A quality sweet-flavored tomato.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 80c

Marglobe

MARGLOBE—(114 days) A leading variety among canners, shippers and market gardeners. The vine is vigorous, resistant to disease, fruit a large, slightly flattened globe, of fine bright scarlet color, very firm and meaty and of the very best quality. Fruits weigh 7 to 9 oz.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

New Tree Tomato

A wonderful variety that grows upright better than any we have ever seen. Tomato firm, solid, thick flesh, large meaty centers. Fruit is purplish pink. Form always round and symmetrical and of medium size. Very productive.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 60c

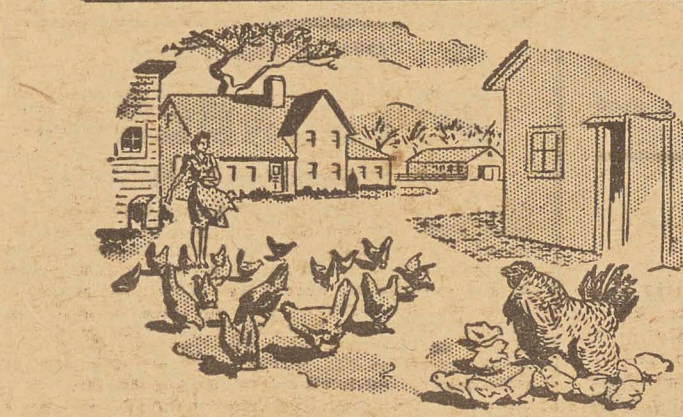

SEEDS FOR POULTRYMEN

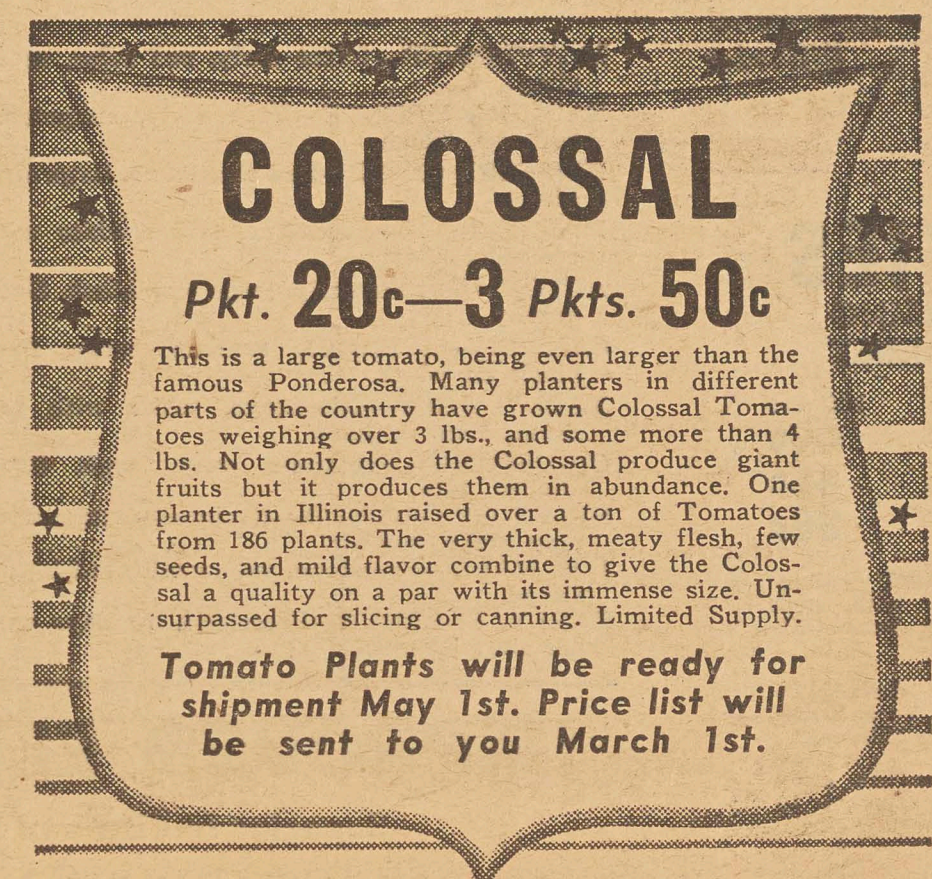

POULTRY CABBAGE

Is a wonderful green food for poultry and has been known to yield 3 tons in a space 40 by 60 feet. You can't beat this for low priced feed. One-half pound of seed will grow enough greens to feed about 1,000 hens for four months; 3 pounds will do for 6,000 hens for four months. Poultry Cabbage is a rapid grower. In the Northern States the seed may be sown any time from early spring until the middle of July. In the South, seed may be sown throughout the entire year.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

GARDEN VICTORY BE SURE TO PLANT SOME OF THE NEWER VARIETIES THIS YEAR

COLOSSAL

Pkt. 20c—3 Pkts. 50c

This is a large tomato, being even larger than the famous Ponderosa. Many planters in different parts of the country have grown Colossal Tomatoes weighing over 3 lbs., and some more than 4 lbs. Not only does the Colossal produce giant fruits but it produces them in abundance. One planter in Illinois raised over a ton of Tomatoes from 186 plants. The very thick, meaty flesh, few seeds, and mild flavor combine to give the Colossal a quality on a par with its immense size. Unsurpassed for slicing or canning. Limited Supply.

Tomato Plants will be ready for shipment May 1st. Price list will be sent to you March 1st.

NEW GUINEA BUTTERVINE

One of the Most Delicious of All Vegetables

The New Guinea Butter Vine is a wonderful vegetable. Grows to enormous size, one fruit often weighing 15 lbs. and from 3 to 5 feet long. In growth it is similar to the squash, and can be grown in the same manner or can be trellised up. It is more productive than squash and much easier to grow. The vines are always free from disease and insect pests, and stand more neglect and abuse than any other vegetable vine we know of. The fruits should be eaten when small, while the fuzzy growth is yet on. It can be cooked like Squash and fried like Egg Plant. When cut up in small pieces and cooked with cream, or fried, it is most delicious. If trellised up, the vines take up so little space, no garden is too small for at least two or three plants.

Pkt. 10c; 3 Pkts. 25c

Chisha, or Chicken Lettuce

You have, no doubt, read in the poultry journals that lettuce is an excellent feed for chickens. In the Chisha Lettuce you will find a feed that yields as much or more than other green feeds. It is economical to grow this strain, for when cut it resumes its growth rapidly and can be cut again and again, or the leaves can be pulled off each stem like the Jersey Kale. The yield is extremely heavy. Chisha, or Chicken Lettuce, does not make a head, but sends up a stout stalk, 3 to 4 feet high, and just loaded with leaves.

Pkt. 10c; 1 oz. 20c; 1/4 lb. 65c

MAMMOTH RUSSIAN SUNFLOWER

Sunflower seed is an excellent poultry feed at all times, and especially during the molting season. Single heads often measure 12 to 22 inches in diameter and contain an immense quantity of seed.

Pkt. 10c; 1/4 lb. 35c; 1 lb. 80c

POULTRY BEET - MANGEL WURTZEL

Furnishes a tremendous yield per acre and makes an excellent green feed for poultry during the winter months and always increases egg production. Mangel Wurzels are excellent food for cattle and keep them in perfect physical condition and increase the flow of milk. Only a little garden space will be required for growing enough to last all winter, and they are very productive. Stored in cellar or any cool place, they will keep until spring.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

Garden Huckleberry

The Garden Huckleberry produces from seed the first year. A new fruit that cannot be excelled for pies and preserves. Very prolific, yielding an immense crop of fruit. It is an annual and must be planted each year from seed. Grows and thrives in all climates and on all kinds of soil. The fruits grow larger than the common Huckleberry or Blueberry. If cooked with apples, lemons, or anything sour, they make the finest jelly. You will be delighted and astonished with this easily grown, wonderful novelty.

Pkt. 10c; 3 Pkts. 25c

Try This New American Drought-Proof Pea

Laughs at Drought, Smiles at Rain. For midsummer planting this is the variety to plant. If it rains and the soil is kept moist, this variety will produce as large a crop as any variety we know of. If it doesn't rain, and it gets hot and dry, you will get a crop anyway. The handsome round pods are well filled with from 7 to 10 peas in a pod; quality excellent, sweet and tender, even when the peas are large. Vines grow 2 feet high, and require no support. This is the pea that will do its best in the North, South, East or West. Don't fail to give it a try.

Pkt. 10c
7 oz. 35c
14 oz. 45c
2 1/2 lbs. \$1.20

Plant SWISS CHARD for Greens

GIANT LUCULLUS. 55 days. The rich green, fleshy, heavily crumpled leaves of this variety make very tasty "greens." The erect plants attain a height of 2 to 2 1/2 feet. Largely sought after by those who prefer the thick, creamy white stems or stalks which are edible and tender, and may be served as separate dish like asparagus. The leafy part can be cooked like spinach or turnip greens, or if desired, the whole leaf can be boiled and served as "greens." There is a delicious, delicate flavor not found in either turnips or kale.

Pkt. 10c; 3 Pkts. 25c

PROSO The WONDER EGG and MEAT PRODUCING Poultry Grain

Here is a new Poultry Grain that owes its origin to Russia, that enables you to raise your own feed. If you only have a small plot of ground, you can make an enormous crop. Proso is unlike anything you have ever seen in this country. It grows more rapidly and matures quicker than other grains. It reaches a height of three to four feet and branches making fifteen to twenty-five heads instead of one. That is why it yields such enormous crops from such unbelievably small plots of ground.

Wonder Egg and Meat Producer for Chickens, Ducks and Geese
Proso makes a splendid mash when ground alone. When feeding with corn or oats the ratio should be four parts Proso to one other grain. It may be fed in bundles as the kernels are readily scratched out of the heads, or it may be fed as clean grain from the thresher. Produces more eggs and meat per bushel than ordinary grains.

Fine for Hogs, Cattle, Sheep, Grows Anywhere, May 20 to June 15 Planting Late.
Although a native of Russia, Proso does better, grows faster and matures quicker in our climate. During the fifteen years since it was first introduced into this country it has become acclimated so that it now grows here just as well as our native crops. It may be planted any time after corn planting time up to the middle of July.

7-oz. pkg. 45c — 2 1/2 lbs. \$1.20 — 5 lbs. (1 acre sowed in drills) \$2.00 — 12 1/2 lbs. (1 acre broadcast) \$4.00 — 25 lbs. \$7.00

YOUNGBERRY

The new Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to handle; it is very attractive, ships well, keeps well and cans well. It has so many commercial possibilities and it fits in so well in the home garden that everybody should be interested in having a few vines or a commercial planting. The Youngberry is the result of the careful and patient efforts of Mr. Young in crossing the Loganberry and the Texas Dewberry. It has given the world its choicest bush berry with characteristics in size, appearance, flavor and general usefulness that has opened new possibilities in berry culture. Youngberries are universally liked and easily grown. They are among the largest berries, of dark wine color, have a minimum of seed, highly flavored and yield a rich looking cherry colored juice. In the home garden you will find that more fruit will be produced from a few Youngberry bushes than any others that will grow on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.
